E-Box has the definitive edge when it comes to stainless enclosures. We understand the need for precision workmanship as well as for fast turnaround when you need stainless enclosures.

As an independent manufacturer we tightly control product quality, ensuring your order will be exactly as specified with quality workmanship. And since your order is started the day we receive it, you're assured

of the fastest delivery in the enclosures industry.

Whether it's standard sizes or unique applications, E-Box has the capability to produce the stainless enclosures you need. Manufactured from Type 304 stainless steel, our enclosures are polished to a #3 brush finish. E-Box also offers 316 stainless. Unique cutouts, special latching and mounting, holes or ventilation- at E-Box we can handle them all. We provide design and engineering services as well as manufacturing directly from your CAD drawing.

Add competitive pricing to our superior quality and unparalleled delivery time and you'll see why when it comes to stainless enclosures we have an edge. The E-Box edge.
